EVONIK Silica and Silicate Products Receive OMRI Listed® Certification for Organic Farming

OMRI’s mission is to support the growth and trust of the global organic farming community through expert, independent, and transparent verification of individual raw materials and crop protection products. By becoming OMRI Listed®, producers of crop protection formulations are already learning about the acceptance of silica and silicate materials through the publically available list on the OMRI website.
Through this certification and verification program, EVONIK has received approval for several of its amorphous silica and silicate products marketed under AEROSIL®, AERODISP®, SIPERNAT®, ZEOFREE®, and ZEOLEX® trade names.
